

Software Engineering: A Practitioners Approach (Mcgraw-Hill Series in Computer Science)

For over 20 years, *Software Engineering: A Practitioners Approach* has been the best selling guide to software engineering for students and industry professionals alike. The sixth edition continues to lead the way in software engineering. A new Part 4 on Web Engineering presents a complete engineering approach for the analysis, design, and testing of Web Applications, increasingly important for todays students. Additionally, the UML coverage has been enhanced and significantly increased in this new edition. The pedagogy has also been improved in the new edition to include sidebars. They provide information on relevant softare tools, specific work flow for specific kinds of projects, and additional information on various topics. Additionally, Pressman provides a running case study called Safe Home throughout the book, which provides the application of software engineering to an industry project.

New additions to the book also include chapters on the Agile Process Models, Requirements Engineering, and Design Engineering. The book has been completely updated and contains hundreds of new references to software tools that address all important topics in the book. The ancillary material for the book includes an expansion of the case study, which illustrates it with UML diagrams. The On-Line Learning Center includes resources for both instructors and students such as checklists, 700 categorized web references, Powerpoints, a test bank, and a software engineering library-containing over 500 software engineering papers. Key Handles: Agile Process Methods covered early in chapter 4 New Part on Web Applications5 new chapters New modular organization will allow faculty to use the book in different course formats.

- o Design course
- o Survey course
- o Management course
- o Web engineering course

Object oriented design has been increased within the market New pedagogy now includes

side bar info on software tools, work flow specific and special Probes:
