

## Discover Java (Six-Point Discover Series)

The Discover series is a quick guide to learning a new technology or topic. It is targeted to people who are new computer users, or individuals who are generally familiar with basic computer concepts, but who are new to a particular technology or software application product. This text is written for programmers, consultants, developers and the like who are beginning to learn this new language (and create Java applets). It deals with the very basics of the Internet programming language.
