

Vexagon Puzzles: Collection 1

Introducing the next generation of Sudoku: Vexagon(TM)! In Sudoku, there are 9 large squares and each large square is made up of 9 small squares; each of these large squares must contain the numbers 1 through 9. In addition, each column and each row must also contain the numbers 1 through 9, so there are a total of 27 constraints. In Vexagon(TM), there are 7 flowers and each flower is made up of 7 hexagons; each of these flowers must contain the numbers 1 through 7. In addition, there are 4 columns and 8 diagonals that must also contain the numbers 1 through 7, so there are a total of 19 constraints. Think that makes it easier? Think again! With each book containing over 200 puzzles and up to 12 difficulty levels (ranging from Easy to Diabolical), everyone will have fun with and be challenged by Vexagon(TM) puzzles! If you're tired of the same old Sudoku, you'll love Vexagon(TM)! Join the Vexagon(TM) craze today!
